

Analyzing E-Learning Platform Purchases using MySQL

(Summary Report)

1. Revenue

- **Highest revenue courses are:**
 - Machine Learning (₹5000 per unit)
 - Python Programming (₹4000 per unit)
- Even with fewer purchases, **high-priced courses contribute more revenue.**

2. Top Customers (Learners)

- **Suresh Kumar** and **John Cena** are high-value customers:
 - Suresh purchased multiple courses (including 2 units of Python)
 - John purchased 3 units of MySQL → strong repeat/bulk buyer

3. Geographic Distribution

- Learners come from:
 - India, USA, Spain, China, UAE
- No dominant country in volume (small dataset), but **India and USA show higher activity.**

4. Course Category Performance

- Categories:
 - Programming
 - Database
 - Development
 - Analytics
 - AI
- **Programming & AI courses generate higher revenue per purchase.**
- **Analytics (Data Science)** has lower pricing → may attract beginners.

5. Purchase Trends Over Time

- Purchases increase from:
 - January → March 2025
- March shows **highest activity (multiple purchases)**

STRATEGIC INSIGHTS:

- Focus on **high-value courses (AI, Programming)**
- Encourage **repeat purchases**
- Offer **bundles and discounts**
- Target **growing months (March onward)**
- Expand geographically based on demand
